EXPERIENCE

COUNTRY DELIGHT *Subscription-based grocery delivery startup, 300K daily orders, $160M revenue* Gurgaon, India

Product Manager (Order flow, Offers, Subscriptions) *Jun '24 - May '25*

- Owned end-to-end discovery, design, and GTM strategy, including messaging and positioning framework, for the 'Cart Offers' initiative, iterating over six months to increase Average Order Value by 24% (revenue up $100K).
- Directed strategic subscription programs using Agile, segmenting and targeting ~100K unsubscribed users via tiered incentives, lifecycle campaigns, and in-app comms to uplift subscriptions by 10% ($30K MRR) in 1 quarter.
- Facilitated GTM strategy for a major brand tie-up with Disney, driving alignment calls, building in-app features to generate user awareness, and working on messaging with growth and design to boost adoption rates by 33%.
- Designed an 'AI-assisted ordering' prototype for non-tech-savvy users, conducting market research and testing internally (37% conversion) before drafting compelling narratives to influence C-suite executives successfully.
- Shipped a complex 'Multi Variant' UX to simplify catalog, leading data architecture, API, and platform changes in collaboration with tech and legal teams to organically improve SKU discovery by 25% and reduce time-to-order.

Associate Product Manager *Jan '23 - Jun '24*

- Drove a data-driven, targeted experiment to grow loyalty program membership, achieving 93% more conversion than baseline (A/B tests), projecting a $21K MRR, and securing management go-ahead for formal development.
- Spearheaded CSAT initiatives by conducting 25+ user interviews and LLM-assisted complaints analysis, then owned a cross-functional roadmap to fix systemic issues, streamline refunds, and reduce complaints by 27%.
- Analyzed root causes for retention drops by creating conversion funnels and a dashboard for outcome metrics, subsequently introducing strategic nudges in the wallet recharge UX to enhance day-30 retention by 8%.
- Executed the app's biggest UX overhaul ('SingleCart' project), handling tech and design challenges while ensuring a stable, phased release (2 major and 20 minor bugs fewer than benchmark) via UATs and regression testing.
- Applied GenAI tools (ChatGPT, Claude, Gamma) to facilitate research, compare copies, refine user stories, design test cases & prototypes, and draft launch notes, cutting turnaround times by 10% and improving productivity.

COLLEGEDUNIA WEB PVT LTD *Ed-tech startup diversified into affiliate marketing, $23.5M revenue* Gurgaon, India

Associate Product Manager *Aug '21 - Jan '23*

- Managed high-revenue Google Ads campaigns for major brands like Nike, leveraging advanced SEM practices, market trends, and competitive research to achieve 310%+ ROI, directly contributing to firm revenue growth.
- Developed automated Python agents as part of a broader intelligence pipeline to analyze 7 major competitors, getting data on 11000+ prospective clients that was used by PMM teams to onboard 120 new clients in 2 months.
- Led end-to-end development of an e-commerce mobile app for a 3-country release, managing the business, tech, design, and content teams to achieve a 4x uplift in downloads and 250% increase in Daily Active Users.
